There is a natural dissidence between reviewers and authors. The main role of reviewers is assuring the acceptance of the best papers only. They have a lot of work to do. Unfortunately, they have the final word.
If you have any particular cases when the cooperation is really bad, then inform us what is wrong immediately, please. We cannot have an impact to the process, if we do not know about problems.

We cannot propose a higher standard. The conference fee is too low for e.g., 4/5 stars hotels or conference centers. However, we try to change locations if possible. Next year is SUT in Gliwice – our Alma Mater.

Most conferences are organized in cities. Maybe Gliwice, Katowice, Cracow or Warsaw as a conference venue could deliver some advantages but the CN was always organized in touristic or even rural places. CN is different in this field. We are trying to put focus on direct participants contact during sessions as well as during the free time. Unfortunately, CN2018 will be organized in Gliwice due to the 25th anniversary of the conference.

We always include some stuff in your conference bag. In recent years, we classified typical conference gadgets as useless. Maybe we are wrong.

We do not plan changing of the publisher and series. We guess that the low estimation of the CCIS series in 2015 would be produced by the late indexation by WoS. Please note, that it not depends on us. We cannot see the reason to be not indexed this year. So, please wait for the estimation!
